The appealed brief filed 02/19/04 has been carefully considered. In view of the following new ground of rejection, the prosecution has been reopened

The 116 amendment dated 1/12/04 have been entered.

Claims 1,3-5,7-13 have been allowed as none of the references shows the limitation of "a second end extending generally perpendicular to said longitudinal axis of said sleeve".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14,17,19-23 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Skelton (Figure 10). Skelton shows all the structure of the device as recited by the claims. Skelton shows the sleeve 64 and it is in cylindrical shape. Claims do not specific that the sleeve has to be a close loop.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14,17,19-23 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Skelton (figure 10) in view of Busch. Busch shows a close cylindrical sleeve. It would have been obvious to make the open sleeve of Skelton a close sleeve as taught by Busch in order to enhance the handling process of providing more security and stability of the thumb in the close sleeve.

Applicant's arguments with respect to claims 14,17,19-23 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire **THREE MONTHS** from the date of this action. In the event a first response is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this office action will be directed to Examiner Joseph Moy, (703) 308-1145.
